WHO AM I?

I'm a person who don't fear trying new things, I really like learn new technologies, i'm used to do it and i'm always looking for challenges. I don't like do the same things always. I'm very interested in AI and Machine Learning and how those can change our life.

EXPERIENCE

- 6/2020 – present **Software Engineer** redbee studios
Project DECIDIR: Decidir is a Payment Gateway Platform integrated with Cybersource to prevent online fraud. For this project, Im performing as a Software Engineer working on the development of APIs integration and creating several interfaces to integrate several platforms.
Scala / Play Framwork! / Redis / Kafka
- 11/2019 – 5/2020 **Data Engineer** redbee studios
Project CENCOSUD CHILE: Cencosud is one of the largest and most prestigious retail conglomerates in Latin America. During this time working for this client, I was responsible for the development of a recommendation product where I worked with machine learning algorithms to understand customers behaviour.
Scala / Spark / Redis / Kafka
- 3/2019 – 10/2019 **Software Engineer** redbee studios
Project COLON SEGUROS: Throughout this experience, I worked for an insurance client and was involved in the development and maintenance of their existing applications as well as the development of new features.
Java / React / Groovy / MySql
- 3/2015 – 3/2019 **Java Fullstack Developer** ICBC Argentina
During his experience at the ICBC Bank I have been involved in several projects. One of them was to develop middleware for the e-banking application. I was mainly focused on the development of services used for final applications and I also participated in the development of their own monitoring tool. On the other side, I was also part of the mobile team working on the new mobile retail application based on microservices.
Java / SQL / Javascript
